Training (with Assessment)

Duration Notes: 2 days

Prerequisites: Learners should have completed the Chainsaw Maintenance Cross-Cutting prior to completing the Chainsaw Basic Felling Techniques (up to 200mm diameter)

Learners are asked to comply with the following requirements; Chainsaws as per HSE guidance and pre-course handout, PPE as per pre-course handout, Operator's maintenance kit and equipment as per pre-course handout, 2-stroke fuel and saw chain oil.

Introduction

Learn how to safely fell small trees.

This course is not suitable for professional users.

Overview in brief

LIVE OVERVIEW For professional chainsaw operators working in forestry and arboriculture the industry recommendation is that for 'high risk' activities (paragraph 137 PUWER ACOP) the minimum level of adequacy of training is to a certificate of competence or nationally recognised qualification where assessment is carried out independently of the training, therefore this course is not suitable for professional chainsaw users.

Using a chainsaw and felling trees are both potentially dangerous activities.

Having total confidence and expertise in what you're doing is essential.

That's where our two-day course can give you the edge.

Our training is delivered by experienced instructors to small groups, so you'll receive plenty of individual attention.

This is a hands-on course that delivers both practical skills and health and safety guidance as well as demonstrating that you and your employer have completed sufficient training to meet the **Provision and Use of Work Equipment Regulations 1998 (PUWER)**.

We also use high-quality course materials to accurately reflect current safe working practices.

The finer details

Our course is a balanced mix of theory and practice.

You'll be guided through all the relevant health and safety guidelines to ensure you stay protected on the job.

After a look at pre-work preparation, you'll then move on to the hands-on aspect of the course.

All the appropriate techniques will be taught, from felling to site clearance.

Course sessions:

- HSE legislation and safety guidelines
- Preparation
- Felling techniques
- Branch removal – snedding and de-limbing
- Taking down hung-up trees using hand tools
- Clearing site and chainsaw checks.

Worth noting: This a physically demanding course, so you'll need at least a minimum level of fitness.

Who should attend?

This course is suitable for people who work in; Agriculture, Horticulture, Woodland industries, Local Authorities, Conservation, Construction, Land-based industries.

Note: Due to the nature of the training a minimum level of fitness is required for specific operations. Whilst we would not want to disadvantage any learner it is an essential requirement.

What will be covered?

By the end of the course you'll be able to:

- Understand risk assessment procedures
- Assess trees to be felled for hazards and associated risks
- Prepare trees to be felled and escape routes
- Fell trees which have a diameter up to 200mm/8” safely and accurately using different techniques
- De-limb felled trees in a safe and effective manner
- Select and use hand tools and maintain them in a safe condition
- Take down hung-up trees using hand tools
- State techniques that must not be used for the takedown of hung-up trees.
