Introduction

Be able to implement and monitor a control programme appropriate to your situation with grey squirrels by completing our half-day course.

Overview in brief

Controlling grey squirrels is a key job in many agricultural businesses.

But ensuring the management of grey squirrel problems is both humane and effective requires specific training.

That's where our course comes in.

Our comprehensive training is ideal for anyone undertaking pest control in land-based or related industries.

It's designed for both novice and more experienced operators.

The finer details

This is a training course.

You'll receive a certificate of attendance once it is completed.

Our course involves a balanced mix of theory and practical sessions.

We'll provide a full working knowledge of both preventative and curative control methods.
